## WRITTEN PARENTAL FEEDBACK FROM END OF YEAR SDC REPORTS JULY 2017

"We are so pleased with the fantastic support A has received and how well she has progressed in her reading, writing and overall confidence in a learning environment.

A's school teacher has said she has made 2 ½ years' progress in reading and and 1 ½ years' progress throughout Year 3. We attribute this success in great part to the brilliant work her SDC teacher has done with A. Thank you for your outstanding teaching, patience and for the kindness you have shown A – it's made all the difference."

Father of A, Year 3 Student

"The report was clear in terms of work covered and progress. It was a lovely report for us to read! Thank you so much for everything you have done for T. It means so much to him and us. T's self-esteem and confidence has grown so much this year.....He is much happier to give work from school a try and is confident enough to let staff know if things aren't quite ok!"

Mother of T, Year 5 Student

"Great report. Amazing results in reading comprehension. It is lovely to see the improvements has made....He now doesn't find reading a problem and will have a go at reading anything – this has been amazing for his self-esteem and confidence. Thank you!"

Mother of H, Year 5 Student

"D is making great progress since having the 1-hour lesson a week at SDC. He is growing in confidence and is applying what he learns at SDC. I have had several discussions with his teachers at school about this and they also see a huge improvement, too.

He really does enjoy the way his SDC teacher teaches and helps him."

Mother of D, Year 4 Student

"It has been wonderful to see S progress so much in maths...quite miraculous to see how he has gone from being unable to add 2 single digit numbers together to being able to do column addition and much more."

Mother of S, Year 6 Student
